JAMS FOR JUNIORS ONLINE

## Make your own drum

You need:

- A medium container – e.g. a plastic yogurt tub or metal tin
- A balloon
- Tape
- Scissors (use with care and under supervision)
- Stickers, paints or textas for decorating

**Instructions:**

1. Take your plastic container or metal tin and remove the lid (make sure there are no sharp or dangerous edges).
2. Cut the mouthpiece off the balloon so you just have the circle part.
3. Stretch the balloon over the open part of your container.
4. Secure the balloon with an elastic band or tape.
5. Decorate the outside of your container or tin with stickers, paint or textas.
6. Use some wooden chopsticks or pencils as your mallots to beat the head of your drum.
